Abstract—**E-learning has been playing important role in pandemic situation for education purpose in all institute like schools colleges universities around the world due to pandemic crisis of COVID -19 hence the cost of e learning affordability is higher so in this paper we discuss methodology This deadly situation we have flipped out offline Teaching process start learn from online E-learning provide most effective Teaching method that Brings out the best effective to find the student activities towards e-learning ,primary data has been collected by national and international wise through Google forms which can be include various schools colleges universities this paper says that how e-learning was most popular all over the world during pandemic future word e learning became most popular source all over the world.**

Keywords— **E-learning, Self study, skill, COVID 19 pandemic student performance.**

I.   INTRODUCTION

The purpose of education is   person one who can survey in all situation and also it is key to personal development and future societies Education helps social responsibilities as well. The main purpose of education is to learn. Learning is process of acquiring knowledge skills through study experience or taught .during COVID 19 we can stop something but we cannot stop education the outbreak of this dangerous virus all institute take alternative methods during lockdown that is E-Learning today's world scenario all are moving into digital world. E-Learning is simple method to understand and implement. The use of laptop, smartphones, pc and the internet are the major components of the learning methodology. E-Learning provides their growth and proved to be the best in all sectors, specially in education during in this lockdown.

Objectives
1. To know the using of E-learning all over the world
2. To identify how student interest and how they using E-Learning resources all over the world

Methodology:
This is based on primary data the data have been collected from student who are all pursuing their under graduate and post graduate degrees in different universities and colleges The online queries and questionnaire and exams through Google forms has been prepared for collecting data.
Through websites also they conduct questionnaire and conducting exam.

II.   CHALLENGE FACED BY E LEARNING:

Screen time issues
Long time interface
Network issues

Solution for screen time issues
Set a timer is one method for screen time issues
Keep your devices as separate for screen time issues

Solution for network issues
Separate your working and sleeping room separate screen time issues occurs means we can proceed this While students facing network issues during e learning that time teacher will be handled that time create separate email box they have any technical based queries and create separate chat room forum and social media group but teacher will be monitorized student because student will Be cheating some times.
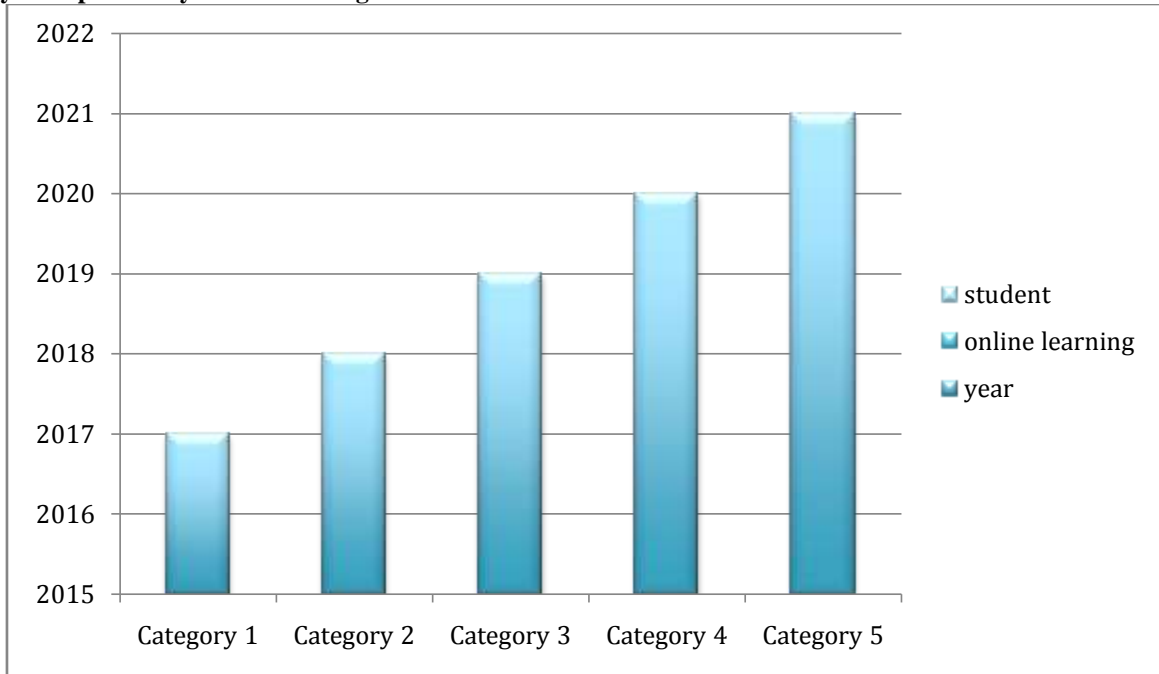

Analysis and willingness of student towards E-learning:

Above bar graph indicates how students willing towards E-Learning and student how respondents and percentage

Data analytic of past five year E-Learning:

Above bar graph data analytic of last five years of online learning   strategies

Table 5.1

Year	Student e-earning percentage
2017	28M
2018	35M
2019	44M
2020	71M
2021	92M

Table5.2

Types of application tool prefer for e learning

classification	respondents	percentage
mail	5	2.36
zoom	66.5	39
Google classroom	43.5	25
Google meeting	66	27.4
What's app	17	10.20
YouTube	40	23.55
total	238	127.51

III. FACE TO FACE TEACHING FOR PRACTICAL LEARNING:

Face to face teaching is Important for implementing practical things e learning is theoretically good but practical it's tough to learning asking student which was better they said face to face is best but future they e learning is best but some disadvantage also there sometimes network issues happened and advantage also there in face to face teaching while our teacher ask take some seminar but student does not do that but e learning student do that .

Overall analysis e learning asking some questions
1. Are you interested in e learning
2. E learning improve your study skill
3. Are you satisfied with Google form test
4. E learning is useful during this pandemic
5. Which one you prefer? Classroom learning /e-learning?

Q1 Yes 100%
   No 0%
   Maybe 0%
Q2 Yes 66%
   No 0%
   Maybe 34%
Q3 Yes 45%
   No 10%
   Maybe 45%
Q4 Yes 100%
   No 0%
   Maybe 0%
Q5 Classroom 66%
   E learning 34%

IV. FINDINGS:

The finding of this study are based on primary data of student

In future this e learning method is most unavoidable in higher education

V. CONCLUSION

E -learning is trend today's world .the online is suitable for everyone this is very comfort and convenient time for all this paper my conclusion is learning no one can stop and today's world become most popular e- learning all over the world during COVID- 19 pandemic e learning became more popular not only students as well as business also her I conclude my thoughts through this paper education no one can stop.

VI. FUTURE SCOPE:

1.Todays world e learning became most popular business both small scale industries as well as large scale industries in future it becomes most popular business
2.80 percentage companies also shifting their learning process in e learning for
Their employees it take less time
3.More than 20 million students registered for e learning in 2021 future
